PROFESSIONAL EXPERIENCE:

Graduate Research Assistant, Stevens Institute of Technology, Hoboken

July 2024 – Present

- Automated the retrieval of 10-K filings from multiple companies using Python scripts, resulting in a 40% increase in data collection efficiency.
- Conducted comprehensive text and sentiment analysis on labor-related content in 10-K filings using Python libraries, which delivered impactful insights on corporate workforce management trends across multiple industries.

Graduate Teaching Assistant, Stevens Institute of Technology, Hoboken

Sept 2023 – Dec 2023

- Provided personalized guidance and support to students through office hours, assisting with concepts, project submissions, and exam preparation, which enhanced student understanding and course engagement.
- Evaluated weekly project progress and graded assignments for 125 students in the Knowledge Discovery and Data Mining course, offering targeted feedback that improved overall student performance.
- Implemented a streamlined grading process that reduced turnaround time for feedback by 20%, allowing students to quickly apply corrections to future assignments.

Software Developer, Creative Finserv Pvt. Ltd., Mumbai

Mar 2020 – June 2020

- Led the transition of the frontend from PHP to Django by utilizing HTML, CSS, Python, and Django, which significantly improved the portal's user experience and maintainability.
- Automated the CRM portal's referral system, reducing manual intervention and enhancing the accuracy of incentive calculations by eliminating human error.
- Streamlined operational processes, resulting in a 45% increase in customer satisfaction and operational efficiency through the optimization of workflows.
- Implemented PostgreSQL for data management, ensuring robust, scalable, and secure handling of customer information, which improved data integrity and performance.
- Decreased page load time by 30% after transitioning to Django, enhancing the user experience.

Web Developer, SAHU Technologies, Mumbai

June 2019 - July 2019

- Created an online presence for the company, which resulted in an upsurge of 40% in sales.
- Collaborated with the front-end development team to create and implement responsive web designs for the client.
- Assisted in the development and maintenance of UI, for optimal user experiences across different devices.
- Corresponded closely with UX/UI designers to translate design mockups into functional web pages, ensuring consistency.

ACADEMIC PROJECTS:

Daily horoscope updates website

Jan 2024 – Feb 2024

- Conducted web scraping of daily horoscope data from an astrology website using Python and BS4 in the Flask backend.
- Utilized React and JavaScript to create dynamic and interactive components that display horoscope data on the web.
- Crafted a user-friendly web portal with HTML and CSS to provide seamless access to horoscope information across all devices.

Live cricket updates website

Feb 2023 – Apr 2023

- Built real-time cricket updates website that has a user-friendly interface by leveraging react.js as the front-end framework.
- Developed a dynamic authentication system with Firebase.
- Took ownership of live commentary, player stats, and real-time chat features using tools like Socket.io and Redis for caching.

Predicting Hazardous NEOs with Machine Learning

Nov 2022 – Dec 2022

- Utilized advanced machine learning algorithms like Logistic regression and SVM to analyze the astronomical dataset consisting of 15000 data objects, enabling the accurate identification and analysis of Near-Earth Objects (NEOs).
- Developed predictive models to assess the trajectories, sizes, and potential risks associated with NEOs, contributing to our understanding of potential celestial threats.

EDUCATION:

Master of Science, Computer Science

Sept 2022 - May 2024

Stevens Institute of Technology, Hoboken, USA.

Bachelor of Engineering, Computer Engineering

July 2017 – June 2021

Mumbai University, Mumbai, India.

TECHNICAL SKILLS:

Languages: Python, Java, C++, JavaScript

Web development: HTML, CSS, React.js, Redux, Redis, GraphQL, Django, Flask

Databases: MySQL, MongoDB, PostgreSQL

Tools and Frameworks: GitHub, MS office

Python Libraries: NumPy, Pandas, Scikit-learn, Keras, TensorFlow, PyTorch, Matplotlib, Seaborn, SciPy, BS4,
